WASTE MANAGEMENT:

> **BOTH ORDINARY WASTE** (organic, tins, plastic, glass, paper, cardboard...) **AND HAZARDOUS WASTE** (hydrocarbons, paints, solvents, batteries, oils, filters, flares, expired drugs, and generally aggressive chemicals) should be separated and arranged containers for each type of waste should be used. If in doubt, ask the port staff.

> **DO NOT THROW ANYTHING** into the sea or the coast.

> **NEVER DISCHARGE** bilge water into the sea or the coast.

> **UNDER CURRENT LEGISLATION**, boats must have wastewater tank, as it should not be discharged into the sea or the coast.

> **CHECK REGULARLY** if there is sewage leak in your boat.

BOAT CLEANING:

> **USE THE MINIMUM POSSIBLE AMOUNT OF WATER.** It's important to use a hose with pistol nozzle.

> **USE BIODEGRADABLE CLEANING PRODUCTS** sparingly or only the strictly necessary amount.

> **REDUCE AFLOAT CLEANING** by pulling the boat to the ground.

> **MAKE SURE TO CONTRACT RESPONSIBLE AND LAW-ABIDING COMPANIES** for the maintenance of your boat.

IMPACT OF BOATS ON MARINE FAUNA & FLORA

> **WHENEVER POSSIBLE**, use anchor buoys instead of free anchoring. In any case, if you use the anchor, try not to do it in sensitive zones like seagrass meadows.

> **RESPECT** the marine fauna and flora during baths and diving.

> **WHEN PRACTICING WATER SPORTS AND FISHING**, apply the rules strictly.

> **DO NOT SAIL** in the vicinity of bird nesting areas.

ACCIDENTAL SPILLS OF TOXIC SUBSTANCES:

> **CHECK REGULARLY** your boat for any fuel or oil leaks.

> **DURING FUELING**, be sure to avoid overflowing the tank or that the hose escapes the tank.

> **IN CASE OF A SPILL WITHIN THE PREMISES OF MARINA NOU FONTANA**, immediately notify the Management or the Ship's Crew. If it occurs outside the port, contact Maritime Rescue via 16 VHF or call emergency number 112.

SAVING WATER AND ENERGY

> **USE ONLY THE NECESSARY** amount of water and do no waste it.

> **USE A HOSE WITH PISTOL NOZZLE** and watch for possible leaks in it and in the water tank of your boat.

> **KEEP CLEAN THE HULL** and regularly check the engine.

> **REDUCE SPEED** during sailing and maneuvers.

> **TURN OFF THE ENGINES** when you are not sailing.

> **REGULARLY CHECK THE ENGINES** to make sure they're running properly.

ALL THESE PRACTICES WILL GUARANTEE YOU AND THE ENVIRONMENT MANY BENEFITS:

- Quality of the marine and terrestrial environment, and thus, quality of life.
- Cost reduction in fuel, water, and energy.
- Tourism conservation.
- Conservation of marine fauna and flora.
- Air quality and less impact on the ozone layer.
